CONTENTS

*Murray Rebner, Barry H. Gross,
John M. Robertson, David R. Pennes,
David L. Spizarny and Gary M. Glazer*

103 CT evaluation of mediastinal masses

*Scott J. Savader, Steven R. Nokes and
Gary Chappel*

111 Case report and review: computed tomography of multiple nodular pulmonary amyloidosis

Peter G. Bernad and H. T. Ballantine

117 Computed tomographic analysis of bilateral cingulotomy for intractable mood disturbance and chronic pain

*T. M. Kolawole, P. J. Patel and
A. H. Mahdi*

125 Computed tomographic changes in juvenile hemiplegia

*Shoji Asari, Yuji Yamamoto and
Toru Satoh*

131 Direct CT demonstration suggesting oculomotor nerve avulsion following minor head trauma: case report

David W. Dunn and Leon A. Weisberg

135 Computed tomography of the brain in metabolic diseases involving the central nervous system in children

Robin E. Osborn and Gerald Kirk

141 Cerebral arterial fenestration

David W. Dunn and Leon A. Weisberg

147 Computed tomography of the brain in asphyxiated infants
